Chip and PIN

ACS has partnered with PayChannel to provide an integrated credit and debit card payment service for magnetic stripe and chip and PIN card payments at ACS Multipark POF machines.

The payment service is a fully managed payment solution that includes a wide range of features to make accepting credit cards secure, fast and hassle-free.

- PayServe onsite server and software
- PCI Compliance
- Network provision and management
- Market leading support
- Real time transaction management & reporting

Implementing PayChannel is straightforward and is more cost effective than you think; all you need to do is provide a BT telephone line by your central ACS Multipark server and our support team will take care of the rest.

Features

- Chip and PIN
- Magnetic stripe cards
- All major credit and
- Debit card schemes
- Multiple merchants
- Multiple acquirers
- Real-time and batch
- Authorisations
- Extensive reconciliation
- Reporting

State of the art card processing systems with the assurance of market-leading support

Choose PayChannel and your operation has the added reassurance of knowing that your card processing will be backed up with the support you would expect from a leading software and networking provider, making your transaction processing stress free.

Features

- Daily volumes and values by car park location and by card type
- Daily volumes per pay on foot, pay and display or exit barrier
- Search for individual transactions
- Real-time Acquirer fee calculations
- Real-time processor fee calculations
- Complete audit trail of user logons and actions

Pay Channel is at the forefront of card processing technology with a UK based software team and operational support 24 hours a day, 365 days per year.

Interactive EFT: Transaction Management and Reporting

Comprehensive real-time transaction reporting and management is provided to merchants 24x7 via Interactive EFT. Customer's can logon to Interactive EFT and perform a wide range of tasks to search, report, download and print transaction data and revenue reports.

A range of standard and custom electronic reports are available to ensure that customer's revenue auditing, reporting and acquirer and PSP fee calculations are fully supported.

Access is available to users via any Internet enabled PC and supports graded permissions and functions for different users in the organization. Each session is encrypted to 256 Bit SSL and records an audit log of user session activity.
