Fully Managed Card Processing

Your card processing requirements – rapidly delivered

In today's market businesses require cost effective and secure credit, debit and gift card processing – seamlessly integrated with effective deployment and support – without the requirement for software and IT resource on their premises.

Whatever your business requirements PayChannel can provide a seamless solution for the full range of card transactions. From systems integration and accreditation for EPOS and chip and PIN terminals, to outsourced processing services for EPOS, e-commerce, IVR and gift cards, PayChannel can deliver the results you need with a service you can afford.

PayChannel brings together expert system integration and accreditation services with a fully Managed Hosted processing service to provide the complete end to end solution for transaction authorisation and settlement services.

State of the art card processing systems with the assurance of market-leading support

Choose PayChannel and your operation has the added reassurance of knowing that your card processing will be backed up with the support you would expect from a leading software and field service provider, making your transaction processing stress free.

Features

- Daily volumes and values by location and by card type
- Daily volumes per terminal, website, till
- Search engine for individual transactions
- Search engine for volumes with successful and unsuccessful transaction
- Card refund transactions by authorised users
- Card debit transactions by authorised users
- Real-time Acquirer fee calculations
- Real-time processor fee calculations
- Complete audit trail of user logons and actions

Interactive EFT: Transaction Management and Reporting

Outsourcing your processing systems won't impair your reporting requirements – PayChannel works with our partners to enhance your transaction management and reporting.

Interactive EFT provides a secure website to report and manage your card transactions and card processing revenue. Daily revenues and breakdown by card type are just a click away from any internet enabled PC. Access is fully protected by usernames, passwords and permissions for different users in your organisation.

Interactive EFT offers a search engine for individual transactions and allows you to process refunds and further debits online.
